VII. OVERALL AVERAGE NUMBER OF TREES PER ACRE (T.P.A.) OVER 3"D.B.H.
_____ Average Trees Per Acre

VIII. IF IN REGENERATION PHASE, NUMBER OF SEEDLINGS PER ACRE
_____ Average Seedlings Per Acre

IX. PLANNED HARVEST DATE(S) AND/OR SILVICULTURAL TREATMENT DATES:
Year: _____

X. I AM MANAGEING THE FORESTED ACREAGE FOR THE FOLLOWING (Check all that apply)

- Sawtimber
- Pulpwood
- Commercial Firewood Production
- Other : _____

Explanation of Harvest/Silvicultural Methods:

It is my/our plan that the real estate stated above be in a planned program of timber management and soil conservation. It is my/our plan to enhance the growth of commercially desirable species through generally accepted silvicultural practices. It is my/our intent to reduce or prevent soil erosion by Best Management Practices as set forth by the Virginia Department of Forestry. Best management Practices to include but not limited to logging road layout and stabilization, stream-side management zones, water diversion practices, and post harvest logging road stabilization. I/we further agree to update our Forest Management Plan every 10 years.

FORESTRY MANAGEMENT PLAN

Your Forest Management Plan can be prepared either by you, or by a professional consulting forester. You should be working toward a commercial timber harvest.

Your plan needs to include the following:

- Acres in growing managed timber
- Species & Size of timber crop present
- Timber management goal(s), what are you managing and growing timber for?
- How do you plan to manage the timber crop?
- How will soil and water quality issues be addressed during and after harvest (ie. Adherence to the Best Management Practices in accordance to the Virginia Department of Forestry)
